

## BMR APP Launch for Apple & Android Devices

Many of you are already using the web worksheet to submit your jobs to the ring office. We have now developed an App to do the vast majority of things that most members use the Ring for.

You can now submit your worksheet as you leave the field, ask for any service we can offer, tell us you are free/not free and even ask for a copy of an invoice when you are doing your VAT and cannot find the paperwork.

To get the App please go to the Apple App store on your iPhone or iPad and type in Borders Machinery Ring. For Android devices the App can be downloaded from the Google

Play Store. Once installed onto your device, you log in with your own e-mail address and the password is the same for everyone. It is **ring** (all lower case). Once in the App please go to profile at the top right and fill in the details required so that you can tell it who you are and then it will not ask again. This way you do not have to put in your details for each request.

One of the things that we have added for your convenience is to re-order the usual volume of fuel at our best price with the minimum of clicks.

If you have any problems, please phone the office and we will lead you through it.

You should receive an email after your request has been submitted successfully – please contact the office if you have not received confirmation

We are very interested in your views of this App and how it can be improved. Please tell us and we will try to incorporate your ideas.
